

product details

trail jet 125 2500-26-0-d

maximum pressure water jet system 2500 bar, 26 l/min, diesel engine

trailer system on fully galvanized chassis with overrun brake and 3 chamber tank system for reducing set-up times for new areas of application for creating a distinctive market positioning in respect to competitors and for ensuring high quality work results. this falch trailer system will impress not only your customers and clients but also your employees.

steel safety frame as a precaution against damage and downtimes.

plastic hood made of impact resistant and special heat resistant hand laminate. protects the engine and pump from dirt and keeps noise levels to a minimum. also fitted with sound insulation in order to avoid complaints caused by noise emissions.

preliminary and fine water filter for consistently clean water quality.

water tank made of plastic, cast en bloc, weldless, integrated into the unit. compensates for pressure variations in the supply and increases the service life of the high pressure pump with bubble-free water. short jetting works or the preparation of sample areas are now possible without external water supply.

water primary pressure pump for optimal water supply of the high pressure pump.

falch slow moving crankshaft pump for extreme operational demands and long-term mechanical service. service and maintenance costs are kept low by using the highest quality materials and parts. the simple, solid pump superstructure means that worn parts can be replaced quickly and cost-effectively even after years in use. valves and pump head are made completely of stainless steel, low-wear piston. includes plunger cooling. lightweight casing, very good heat dissipation, hp seals with gaskets - long service life, easy to replace, low priced. robust drive designed for 10,000 hrs, no water in oil possible since the modules are separate. pressure steplessly adjustable.

safety fittings, such as rupture discs or safety valve, avoid excessive pressure build up.

diesel engine deutz 4-cylinder water cooled, 129 kW, 4.760 ccm capacity, with power reserves for 100% continual use. powerful torque - low vibration. the engine is extremely speed reduced for the purpose of noise insulation, service life, extended periods between servicing and to reduce the fuel consumption. service life: approx. 15,000 hours (corresponds approx. to 900,000 km of a vehicle). service only every 500 hours, low fuel consumption, excellent waste gas values.

product details

trail jet 125 2500-26-0-d

fuel tank made of plastic, cast en bloc, weldless, large tank for large refuelling intervals. impact resistant and rust free for safety purposes.

safety/control for the safety of the complete system some components are installed over and above the statutory requirements. the entire monitoring of the machine is made by the solid "falch easy" electronic control system. display with indication of rpm, pressure, operating hours, maintenance hours and a lot more.

operating hour meter for easy monitoring of blasting work times and service intervals.

anti-theft device to protect units stored on-site at night against theft.

anti-frost-system integrated in order to make frost-proofing of mobile appliances fast and uncomplicated and to ensure all-year operation.

easy for quick and easy dismantling and installation of dirty or damaged components directly on-site.

holder for accessories case.

holder for water inlet hose reel, 25m 3/4" water hose.

high pressure hose nonstop 25, 20m, 2500 bar, 70 °C, 8mm inner diameter. the 6 steel inlays and the additional protective hose ensure especially long durability without repair costs. connections equipped with the new falch quicklocksystem the provided hose reel for ultra high pressure hoses saves a lot of time and space.

control cable 25m including cable reel.

high pressure falch gun 30, with electric control and shoulder support guarantees long-term blasting operation with minimum strain on the operator.

lance with nozzle holder and flat jet nozzle for safe working.

accessories by falch provide further options and save time during blasting.

optimal protective clothing and special seminars mean operators can achieve better and faster results.

service: our world wide network of service partners are ready to provide you with express spare parts and repair service.

guarantee: falch offers a 24 months guarantee with unlimited operating hours for the whole equipment. we refer to our guarantee terms.
