## aqua speed 1100w

### high pressure cleaner 500 bar, 15 l/min

steel safety frame as a precaution against damage and downtimes as well as to simplify transportation and attachment to vehicles.

holding devices for accessories to store lances and hp-hoses easily and comfortably at the machine.

solid rubber wheels (low-maintenance, durable) for easy transport as well as for easier loading onto and unloading from the vehicle.

water filter for consistently clean water quality.

crankshaft pump with ceramics plungers, high-quality pump head, long service life and maintenance-friendly set-up. pressure continuously adjustable.

pressure control for more performance, more safety and less wear. pressure control system for variable pressure control, patented by falch. inclusive soft start system. pressure release in the hoses during interruption of work. increases service life of nozzles and accessories.

electric engine with power reserve for 100% continual use as well as start-up current optimisation to prevent fuses being blown.

safety/control for the safety of the complete system some components are installed over and above the statutory requirements. the control purposefully operates without any electronic components in order to prevent downtimes caused by vibration, humidity and coldness.

operating hour meter for easy monitoring of blasting work times and service intervals.

high pressure hose nonstop 5, 10m, 500bar, 155°C, thanks to its 10mm internal diameter has just approx. 1/3 of the pressure loss of an 8mm hose. the 2 steel inserts provide for extra durability without any repair costs. the unique stainless steel quick releases on falch hoses continue to save time when assembling and dismantling the unit even after years of use.

high pressure gun falch gun 5 with servo power assistance and the smart nozzle cleaning needle. is intended to ensure continuous blasting by the operator without pains in hands and joints.

lance, for safe working. thanks to reinforcements in the hand protector and metal tubes there is now no pipe kinking or damage to thread connections (stainless steel) even if accidentally dropped.

accessories by falch provide further options and save time during blasting.

optimal protective clothing and special seminars mean operators can achieve better and faster results.

hot water operation can be subsequently extended from cold to hot water thanks to the falch module system.
